

# Prescription Drug Coverage

CDPHP is pleased to be affiliated with Caremark® to help us manage our members' pharmacy benefits. This partnership provides convenient online access to detailed reliable pharmacy benefits information. Employers and members are welcome to search basic details on the CDPHP drug formulary, including tier information. This feature is set up using \$10/\$25/\$40 three-tier coverage for illustration purposes. You must click through all steps of pricing in order to view complete coverage information. Members can log onto Caremark.com using their member ID to get details specific to their benefit plan, such as: whether a particular drug is covered by CDPHP, how much they can expect to pay for the drug, and generic alternatives to the drug.
