## INTRODUCTION

Capital District Physicians' Health Plan, Inc. (CDPHP) is pleased to provide the *CDPHP Medicaid Select Plan Clinical Formulary 2015* as a useful reference and informational tool to assist practitioners in selecting clinically appropriate and cost-effective drug therapies.

The information contained in this *CDPHP Medicaid Select Plan Clinical Formulary 2015* and its appendices is provided by CDPHP, solely for the convenience of medical practitioners. CDPHP does not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. This *CDPHP Medicaid Select Plan Clinical Formulary 2015* is not intended to be a substitute for the knowledge, expertise, skill, and judgment of the medical practitioner in his/her choice of prescription drugs. All the information in the *CDPHP Medicaid Select Plan Clinical Formulary 2015* is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber. The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

CDPHP assumes no responsibility for the actions or omissions of any medical practitioner based upon reliance, in whole or in part, on the information contained herein. **The medical practitioner should consult the drug manufacturer's product literature or standard references for more detailed information.**

National guidelines can be found on the National Guideline Clearinghouse site at [www.guideline.gov](http://www.guideline.gov), on the websites listed under each therapeutic class and on the sites listed in the WEBSITES section of this publication.

Please note, the information found in the *CDPHP Medicaid Select Plan Clinical Formulary 2015* only applies to Medicaid Select.

## PREFACE

The document is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action. Products are listed by generic name with brand name for reference only. Unless the cited drug is available as an injectable or an exception is specifically noted, generally, all applicable dosage forms and strengths of the drug cited are included in the document.

Coverage of any agent listed in the formulary may be subject to quantity limits, prior authorization, and/or step therapy requirements. Injectables are generally covered under the medical benefit. Injectables that are listed in the *CDPHP Medicaid Select Plan Clinical Formulary 2015* are covered under the pharmacy benefit unless otherwise noted by the "A" symbol. Pharmacy benefits may impose additional coverage restrictions or may not cover selected drug products.

*Please note that all new drugs will be excluded from the formulary and require prior authorization until reviewed by the CDPHP P&T Committee.*

## PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The CDPHP P&T Committee includes a cross-section of practicing network physicians and pharmacists whose primary role on the committee is to ensure that the most clinically appropriate and cost-effective drugs will be available for CDPHP members. The P&T Committee is responsible for reviewing new drugs, reviewing and revising pharmacy policies, reviewing patient profiles and drug utilization review quarterly reports, and reviewing clinical initiatives/programs for all lines of business. The members of the P&T Committee are bound by a confidentiality and conflict of interest agreement, which is renewed annually.

The actions of the CDPHP P&T Committee are communicated after each committee meeting by posting final decisions on the CDPHP web page Formulary Updates section of Rx Corner on the providers tab of [www.cdphp.com](http://www.cdphp.com).

## PRODUCT SELECTION CRITERIA

When a new drug is considered for formulary inclusion, it will be reviewed relative to similar drugs currently on formulary. In addition, the entire CDPHP formulary is reviewed on an annual basis.

Quantity limitations, prior authorizations, and/or step therapy may also apply to formulary drugs. **Excluded drugs are not covered unless medical exception procedures have been followed and a medical exception is approved.**

## DRUG LIST PRODUCT DESCRIPTIONS

To assist in understanding which specific strengths and dosage forms on the document are covered, examples are noted below. The general principles shown in the examples can usually be extended to other entries in the book. Any exceptions are noted.

**Listed products on the document generally include all strengths and dosage forms of the cited brand-name product.**

*zolmitriptan*

*Zomig*

Nasal spray, oral tablets, oral disintegrating tablets, and all strengths of Zomig would be included in this listing.

**When a strength or dosage form is specified, only the specified strength and dosage form is on the document. Other strengths/dosage forms, including injectable dosage forms of the reference product are not.**

*rivastigmine transdermal*

*Exelon Patch*

The transdermal dosage form of Exelon is on the document. From this entry, the oral tablet and the oral solution cannot be assumed to be on the list unless there is a separate entry.

**Extended-release and delayed-release products require their own entry.**

*metformin*

*Glucophage*

The immediate-release product listing of Glucophage alone would not include the extended-release product Glucophage XR.

*metformin ext-rel*

*Glucophage XR*

A separate entry for Glucophage XR confirms that the extended-release product is on the document.

**Dosage forms on the document will be consistent with the category and use where listed.**

*neomycin/polymyxin B/hydrocortisone*

*Cortisporin*

Since Cortisporin is listed only in the OTIC section, it is limited to the otic solution and suspension. From this entry the topical cream cannot be assumed to be on the list unless there is an entry for this product in the DERMATOLOGY section of the document.

## GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. **Boldface type** indicates generic availability. However, not all strengths or dosage forms of the generic name in boldface type may be generically available. In most instances, a brand-name drug for which a generic product becomes available will become non-formulary, with the generic product covered in its place. However, the document is subject to state specific regulations and rules regarding generic substitution and mandatory generic rules apply where appropriate.

Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness, and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may be different from the brand in size, color and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug (therapeutic equivalence).

## SPECIALTY DRUGS (SP)

Specialty pharmaceuticals are used in the management of complex chronic or genetic conditions and certain catastrophic diseases. They are often injectable medications, but they may also include oral agents. CDPHP has chosen CVS Caremark Specialty Pharmacy Services as the preferred vendor to dispense high-cost injectables and biotech drugs for its members. Eligible members will need to register and will receive a 30-day supply of medications and additional supplies needed to administer the medications. Specialty medications are available through CVS Caremark Specialty Pharmacy Services, toll-free at 1-800-237-2767.

Managed Medicaid members, or providers on behalf of members, may contact CDPHP and request to obtain specialty drugs at a retail pharmacy, rather than CVS Caremark Specialty Pharmacy Services. CDPHP will facilitate the process by sending the appropriate paperwork to the network pharmacy. The network retail pharmacy must accept the price comparable to that of the specialty pharmacy, as well as sign a member/drug-specific contract amendment. Contract amendments refer only to price, not terms and conditions, and are not required for each refill. For further information, please call the CDPHP Pharmacy Department at (518) 641-3784.

Drugs that are considered specialty medications are noted within this booklet by the "SP" symbol.

## PRIOR AUTHORIZATION (PA)

CDPHP requires prior authorization for certain drugs before they will be approved for coverage. Coverage will be approved when specific approval criteria for that drug is met, according to CDPHP policies.

The list of drugs that require prior authorization is subject to change from time to time and may not be all-inclusive. If a drug requires prior authorization, the prescribing practitioner should initiate a prior authorization request with CDPHP. Prior authorization can be requested through the CDPHP Pharmacy Department by faxing the request to (518) 641-3208. Drugs that require prior authorization are noted within this booklet by the "PA" symbol.

## PRESCRIPTION QUANTITY MANAGEMENT

CDPHP, working closely with the P&T Committee members, has chosen to limit the quantity of certain drugs that CDPHP may cover for a member. Quantity limits are in place for quality and/or clinical considerations. The list of drugs that have quantity limits is subject to change from time to time and may not be all-inclusive. Drugs that have quantity limits are noted within this booklet by the "QL" symbol.

## STEP THERAPY (ST)

The Step Therapy (ST) program is another form of prior authorization. The step therapy program uses a standard protocol to determine if members qualify for a drug that otherwise would not be covered. Using the standard protocol, certain drugs are not covered unless members have tried one or more "prerequisite therapy" medication(s) first. If it is medically necessary for a member to use a step therapy medication as initial therapy without trying a "prerequisite therapy" drug, the practitioner can request coverage of the step therapy medication through a medical exception.

The list of drugs that require step therapy is subject to change from time to time and may not be all-inclusive. If a drug requires step therapy and the practitioner determines that the drug is medically necessary, please submit the CDPHP Medical Exception Form by fax to (518) 641-3208 for consideration. Drugs that require step therapy are noted within this booklet by the "ST" symbol.

## MEDICAL EXCEPTION

The CDPHP P&T Committee developed the Medical Exception policy so that practitioners may request an excluded drug for a specific patient when medically necessary. The Medical Exception process is coordinated through CDPHP's Pharmacy Department. Requests are processed in the order received. Medical exceptions can be requested through the CDPHP Pharmacy Department by faxing the request to (518) 641-3208. In addition, a member may initiate a medical exception request by calling the telephone number to CVS/caremark printed on their CDPHP identification card or by utilizing the "Medical Exception Request" option found under Prescription Forms & Lists on the Forms and Tools section on the members tab of CDPHP's website, [www.cdphp.com](http://www.cdphp.com). A response will be sent to both the medical practitioner and member as soon as possible.

## PLAN DESIGN

The document represents a closed formulary plan design. The medications listed on the document are covered by the plan as represented. Certain medications on the list are covered if utilization management criteria are met (i.e. Step Therapy, Prior Authorization, Quantity Limits, etc); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity. If a medication is not listed on the document, a formulary exception may be requested for coverage. Medical necessity or formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard non-formulary prescription request criteria.

## EDITOR

Your comments and suggestions regarding the *CDPHP Medicaid Select Plan Clinical Formulary 2015* are encouraged. Your input is vital to this formulary's continued success. All responses will be reviewed and considered. Please send your comments to:
