

## Medicare Advantage Part D High-Risk Medications Requiring Prior Authorization

There is clinical consensus that many commonly used medications can cause toxic effects, drug related problems and medical and safety consequences for older adults. Many of these high-risk medications are noted in the Beers report, NCQA HEDIS measures, and CMS ranking data.

The following list of drugs will require prior authorization for members 70 years of age and older per policies 1350/20.000242 and 1350/20.000359. Please note that this is not a comprehensive list of ALL high-risk medications for older adults. For a full list of drugs that are covered on the Part D formulary, please visit <http://www.cdphp.com/medicare>.
