# SCREENING AND IMMUNIZATION LIST

These are important tests and immunizations you should ask your doctor about based on your age and gender.

DATE RECEIVED	IMMUNIZATION/SCREENING	SPECIAL NOTES	NEXT DUE DATE
	Lead screening	A simple blood test to check for high lead levels in children before age 2; high lead levels can harm your child	
	Meningococcal vaccine	Protection against meningitis, a potentially deadly disease <i>(by age 13)</i>	
	HPV	Three vaccines that can help protect your child from certain types of cervical cancer <i>(by age 13)</i>	
	Flu	Influenza protection <i>(every year)</i>	
	Tdap	Tetanus and whooping cough protection <i>(Check with your doctor for babies, adolescents, and adults)</i>	
	Varicella	Immunity to chicken pox	
	Mammogram	Breast cancer screening <i>(Women: every two years or as recommended by your doctor)</i>	
	Pap smear	Cervical cancer screening <i>(Women 21 and older: every three years or as recommended by your doctor)</i>	
	Chlamydia	Women: a urine test to detect a potentially “silent” sexually transmitted disease (STD)	
	Colorectal cancer screening	Yearly stool testing with fecal occult blood or fecal immunochemical testing <i>(over age 50)</i> Flexible sigmoidoscopy – every five years or as recommended by your doctor <i>(over age 50)</i> Colonoscopy – every 10 years or as recommended by your doctor <i>(over age 50)</i>	
	Dilated retinal eye exam	For members with diabetes <i>(every year or as recommended by your doctor)</i>	
	Zoster	Immunity to shingles <i>(1 dose at/over age 60)</i>	

Immunizations are shots. They are needed to protect you and keep you healthy!

<b>DATE</b>	1/5/2016							
<b>Blood Pressure (systolic/diastolic)</b> <i>Your doctor will tell you what a healthy blood pressure is for you. Let your doctor know if your BP is greater than 140/90 on a regular basis.</i>	Healthy range							
<b>Weight</b>	120 lbs.							
<b>BMI (Body Mass Index)</b> 18-24	22							
<b>Heart Disease Risk Assessment (high, moderate, or low risk)</b> <i>Your doctor will determine your risk and review options to reduce that risk if necessary.</i>	Low risk							

**FOR MEMBERS WITH DIABETES:**

<b>HbA1c (blood test)</b> <i>Your doctor will tell you what a healthy number is for you.</i>	7.2							
<b>Urine test (Microalbumin)</b> <i>Test for protein</i>	Negative							

**OTHER LAB TESTS YOUR DOCTOR MAY ORDER:**

It's important to know your BMI.  
A healthy BMI = a healthy weight.

List any medications you are taking. *Cross them off when you're finished.*

# Ask Me 3<sup>®</sup>

Health information is not clear at times. The Ask Me 3<sup>®</sup> program run by the National Patient Safety Foundation can help. The program gives you three questions to ask your healthcare provider during a health care visit, either for yourself or for a loved one. They are:

- What is my main problem?
- What do I need to do?
- Why is it important for me to do this?

Asking questions can help you be an active member of your health care team.

For more information on Ask Me 3<sup>®</sup> and to view a helpful video on how to use the questions, please visit [www.npsf.org/askme3](http://www.npsf.org/askme3)
