## **Medicaid Select/HARP/Child Health Plus Over-The-Counter (OTC) Drug List**

**Effective October 1, 2020**

CDPHP, in alignment with Medicaid Fee-For-Service, provides coverage for select over the counter (OTC) medications or products when a prescription is presented at a participating network pharmacy. Select analgesics, allergy, cough and cold preparations, digestive products, insulin, topical products, and vitamins w/or without minerals may be eligible for coverage. Not all formulations, sizes or products are covered in every category. If the product National Drug Code (NDC) is not found on the FFS formulary file, then it is not eligible for coverage. The link to the Medicaid FFS list of reimbursable drugs is available here: <https://www.emedny.org/info/formfile.aspx>.
