

Suggested Standard Codes for Healthier Generation Benefit

CDPHP® members aged 3 to 18 years with a body mass index (BMI) \geq 85th percentile may receive four office visits with their primary care provider and four visits with a registered dietitian per year. All services are subject to applicable deductibles, copayments, coinsurances, and/or group-specific contract limitations, if any.

In order to help us measure the success of this initiative, please document body mass index percentiles and append the following codes:

V85.53	BMI, pediatric, 85th percentile to less than 95th percentile for age (overweight)
OR	
V85.54	BMI, pediatric, greater than or equal to 95th percentile for age (obese)

Please use standard billing codes (as suggested below). The usual member payment obligations (per the member's contract) will apply.

99381-99385	Preventive Medicine/New Patient
99391-99395	Preventive Medicine/Established Patient
99201-99205	Office Visit/New Patient
99211-99215	Office Visit/Established Patient (attach modifier 25)*

*use modifier 25 when billing an office visit in addition to a well visit

If also providing nutrition or exercise counseling during visit, you may add:

V65.3	Dietary surveillance and counseling (must be used with other obesity code)
V65.41	Exercise counseling
V69.0	Lack of physical exercise
V69.1	Inappropriate diet and eating habits
V77.8	Special screening for obesity
97802	Medical Nutrition Therapy; initial assessment and intervention, individual, face to face each 15 mins. (can be billed in multiple units)
97803	Medical Nutrition Therapy; follow up re-assessment and intervention, individual, face to face each 15 mins. (can be billed in multiple units)
